

# LED Roof Mounted LightBar

Provide a visual warning of vehicle movement

Extremely bright and visible

Long life LED technology

## BE SAFE ... BE SEEN ...

The Rearsense roof mounted LED lightBar range has been specifically designed and tested to work in the extreme weather and work site conditions that heavy duty machines must perform in every day.

A very useful accessory to other Rearsense products, the LED lightBars provides other vehicles and pedestrians a visual warning that there is vehicle movement within proximity on the work site. This will give them the extra time they need to react before an accident occurs.

With four magnetic foot mounts, the LED LightBar can be easily mounted. The LED range comes in various sizes, LED configurations, colours and voltages. There are also 15 selectable flash pattern options, specifically designed to be visible regardless as to whether you are working on a sunny day or a rainy evening.

Available in Amber, Green, Blue and Red

### LED LightBar:

- > 1 Watt Gen3 LEDs
- > 15 Selectable Flash patterns
- > Visibility exceeds 800metres
- > Exceeds 90-180 flashes (ON/OFF) per minute
- > Field of view: 360 degrees diagonal
- > Power: 12VDC or 24VDC models
- > Available in Amber / Red / Blue and Green
- > Cigar Lighter connection complete with On/Off Switch
- > Operating temperature: -10 to +50C

### Mounting:

- > Magnetic (permanent magnets)
- > Can be modified to have alternate mounting

### General:

- > Exceeds NZTA and COPTM requirements
- > Works in extreme weather
- > Withstands vibrations over 10G
