

Rearsense LED Red Line Light

Strong LED Light warning system

Visual warning system that ensures pedestrians are safer by highlighting pedestrian hazard zones

Key Advantages

-  Promotes greater safety : Bright red line lights projected on the floor are highly visible to alert pedestrians of danger areas. Ideal for Forklifts, Loaders etc.
-  Easy to install : On new or retrofits by an Auto Electrician, usually 3 x units around vehicles to create areas
-  Multi-purpose : Suitable for indoor use with normal lighting — red line light remains very bright and highly visible

-  Compact square-shaped LED design
-  Long lasting powerful light with high brightness
-  Low power waste
-  Multi-voltage 10-80V

Product Features

Technical Specifications

SPECIFICATION	
Light Sources	LED
LED Colour	Red
Material	Aluminium Alloy and Polycarbonate
Voltage	10V-80V
Operating Temperature	-40°C ~ +80°C
IP Rate	IP 67
Mounting	Screw
